Personal information

Name	Borislav Krasimirov Borisov
Year born	1991
Place	Varna, Bulgaria
Profession	Web developer
Contact	Email: borislav.k.borisov24@gmail.com Website: https://bkb24.netlify.com/ Github: https://github.com/bkb24

Short summary

I have experience as full stack developer (PHP) working on one of the biggest learning platforms in Bulgaria - ucha.se.

Also worked on the side with Node and express as I am willing to learn new technologies and change the stack if necessary. On the client side I am comfortable with Vue (with Vuex) or React. Now I am working as a freelancer as I have the need to be remote because of personal issues.

Technical skills and competences

Web / Backend	- Familiar with basic security issues - Authentication and authorization - Web services, API - HTTP - PHP – 5.x, 7.x - OOP - ORM - Eloquent - Database migration tools – migration tool in Laravel and Phinx - Laravel - Node - ES6 - Express - Socket.io - ws (npm module for websockets) - Websockets
CMS, eCommerce	- Wordpress – creating sites with Elementor builder, customizing or creating child themes, doing performance optimizations and basic SEO - WooCommerce

Database	• MySQL/MariaDB • Redis • MongoDB
Javascript	• jQuery • Gulp, Webpack • AngularJS (angular 1) • Vue, Vuex • React • Gatsby
CSS	• Responsive design • Bootstrap 2.3.2/3/4 • SASS
Version control	• SVN –TortoiseSVN • Git – GitHub, GitLab
Other	• Experience with Agile development – Scrum • Experience with JIRA • Basic on-site SEO (local SEO)

Working history

IT consultant, freelance

from October 2018

I am working on projects of different kinds with the technology stacks needed. So far I have worked on PHP projects (with Laravel, Wordpress, WooCommerce), static sites (React, Vue, Gatsby) and an express/websockets real-time application. From 2019 I am working on several projects and other little jobs at the same time, while also learning new things like SEO, email and online marketing, dropshipping and so on.

I've also consulted a few people on how to approach developing their small business websites and SEO.

ucha.se - https://ucha.se

from August 2015 to September 2018

ucha.se is one of the biggest online learning platforms for Bulgarian students. It offers video lessons as well as interactive tests to help the students prepare. As a full stack developer at ucha.se I helped implement some of the features of the platform or the framework and ORM as well.

English language comprehension

Fluent in reading, speaking and writing enough to understand technical articles and manuals or communicate with coworkers.

Education

- High school – A. Pushkin High School with language education. English as main language (from 2005 to 2010)
- Technical University Varna – BA in Computer Systems and Technologies (from 2010 to 2014)
