Full stack PHP / NodeJs developer, Vue and React on the font-end

✉ borislav.k.borisov24@gmail.com   🌐 website   in LinkedIn   ⌨ github

Skills

Back-end – PHP 5.x/7.x, Laravel, Slim, NodeJs, express, websockets, Redis
Database – MySQL/MariaDB, some MongoDB
Front-end – Vue, Vuex, GatsbyJs, React, jQuery, Bootstrap 2/3/4, SCSS, SVG
CMS – WordPress, WooCommerce, DirectusCMS, NetlifyCMS
Other – JIRA, Bitbucket, GitLab, SVN, Git

Larger Projects

pazarluk.com *(Full-stack PHP developer)*
The team needed a developer to design and build the entire mobile version for the website. Also needed some work on the admin panel, mainly optimizing pages load times and also some other work on desktop
Stack: PHP, Laravel, MySQL, Vue, Redis

ucha.se *(Full-stack PHP developer)*
ucha.se is one of the most popular educational platforms in Bulgaria. The job included - work with payment modules; authentication and authorization; admin panel pages; monthly, yearly or other reports; creating API's; SVG icon system; optimizing queries and the overall speed plus a lot more. The team was using their own MVC framework and ORM and many features had to be developed – session management, web security modules, ORM mapping logic (many-to-many etc.) and more
Stack: PHP, MySQL/MariaDB, jQuery
